Pilani, India | sulakshya.misra5@gmail.com | +91 94605 03023 | linkedin.com/in/sulakshyamisra

## Summary

Mathematics graduate with strong training in quantitative modeling, statistical analysis, and data-driven decision making. Experienced in building predictive models, analyzing complex datasets, and translating analytical insights into actionable recommendations. Proficient in Python, Excel, and data visualization tools. Interested in applying analytics and modeling techniques to healthcare decision-making and outcomes research.

## Education

**Birla Institute of Technology and Science, Pilani**  
M.Sc. (Hons.) - Mathematics  
2022 – Present (Graduating 2026)

**Birla School Pilani**  
CLASS XII  
2020 – 2022  
Percentage: 93.2%

**Relevant Coursework:** Probability and Statistics, Financial Risk Analytics and Management, Applied Statistical Methods, Numerical Analysis, Computer Programming, Derivatives and Risk Management, Numerical Methods for Partial Differential Equations, Ordinary Differential Equations, Partial Differential Equations

## Experience

**Data Analyst Intern** Jul 2025 – Dec 2025  
BGIIES, Bangalore

- Analyzed startup and AI ecosystem data to deliver strategic, actionable insights to executives.
- Built a data-driven allocation model for a booking system to optimize resource utilization.
- Visualized operational data to track budgets and metrics for 100+ attendee forums.

**Data Analyst Intern** May 2024 – Jul 2024  
Ultratech (Aditya Birla Group)

- Built an Excel predictive model analyzing complex process variables to forecast outcomes.
- Performed sensitivity analysis on energy metrics and presented data findings to leadership.
- Developed a data model to analyze and optimize energy consumption in production workflows.

## Skills

**Technical Skills:** Python, MySQL, Advanced Excel, Power BI

**Analytical Methods:** Predictive modeling, Regression, Optimization, Risk analysis, Scenario modeling

**Tools:** PowerPoint

## Projects

**Valuation and Risk Modeling Project** Jan 2025 – May 2025

- Conducted time-series analysis of stock volatility across multiple horizons.
- Built financial models to estimate cost of capital and firm valuation.
- Performed peer comparison to support capital structure and investment decisions.

**Security Analysis and Portfolio Management (SAPM)** Aug 2024 – Dec 2024

- Constructed an optimized multi-asset portfolio using quantitative risk-return metrics.
- Evaluated performance against market benchmarks using Sharpe ratio and variance analysis.
- Interpreted findings to assess portfolio efficiency and market behavior.

**Network Congestion Modeling and Optimization - Operations Research** Jan 2026 – May 2026

- Developed a dynamic queueing-network simulator to model system congestion, incorporating complex variables like balking, reneging, and server vacations.

## Certifications

**Crash Course on Python – Google** Sept 2025

**Introduction to Financial Engineering and Risk Management – Columbia University** Feb 2026

## Positions of Responsibility

**APOGEE Coordinator** Jul 2024 – Apr 2025

Gaming Club, BITS Pilani

- Organized Armageddon, a flagship gaming event under APOGEE, the annual technical festival of BITS Pilani.
